Light Up the Hospital! 2025

OmniBed CareStation for KLH Maternity Ward

Your donation to this year's Light-Up the Hospitals! campaign will help fund the purchase of a state-of-the-art OmniBed CareStation for the Maternity Ward at Kootenay Lake Hospital. This advanced unit combines an incubator and radiant warmer in one, providing a stable, warm environment with gentle temperature and humidity control. It helps protect at-risk babies, such as those born prematurely or requiring additional medical support.

With integrated features such as oxygen delivery, suction, and a rotating mattress, the OmniBed makes it easier for clinicians to respond quickly while keeping babies as comfortable and undisturbed as possible. It also provides vital support to stabilize infants for safe transfer to specialized facilities when needed.

"Donor support strengthens local healthcare," says Kootenay Lake Hospital Foundation Chair Brent Cross. "The OmniBed CareStation will help hospital staff deliver specialized care for vulnerable newborns in our community."

Thank you for keeping our littlest patients warm and safe.

Please visit www.klhf.org for more information about this equipment and to make your secure donation online, or call the Foundation office at 250-354-2334.

Any funds raised in excess of our goal will be directed to the purchase of other priority medical equipment for Kootenay Lake Hospital.
